# Node Installation

-Nguyen Hoang Tuan Anh-

Step 1 :
_ Enable your administrator rights (follow these steps):
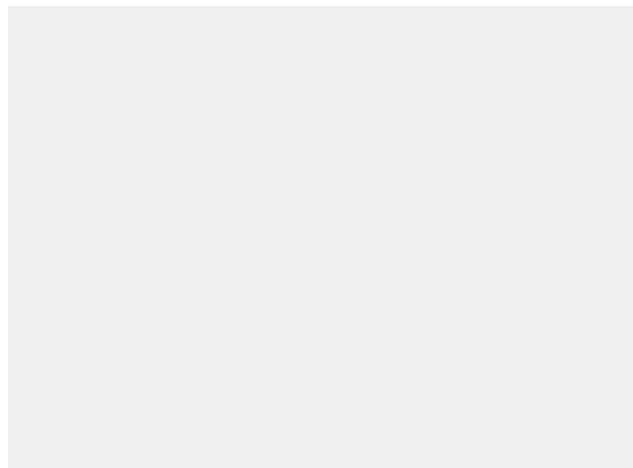

+Wait for a few days , after you see the confirmation email, Open your IT Workplace to enable administrators rights (check the pictures below for descriptions)
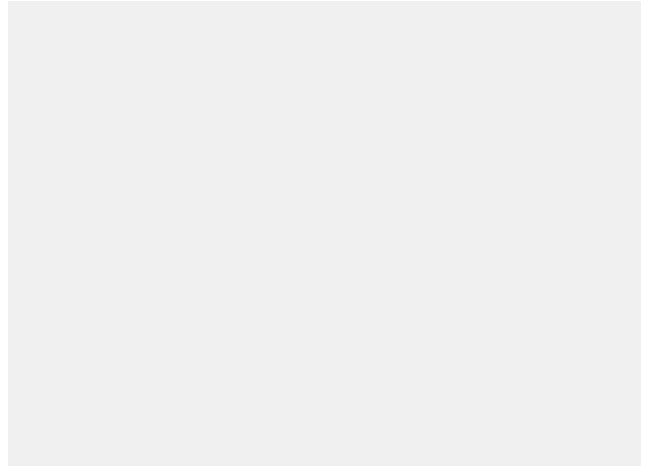

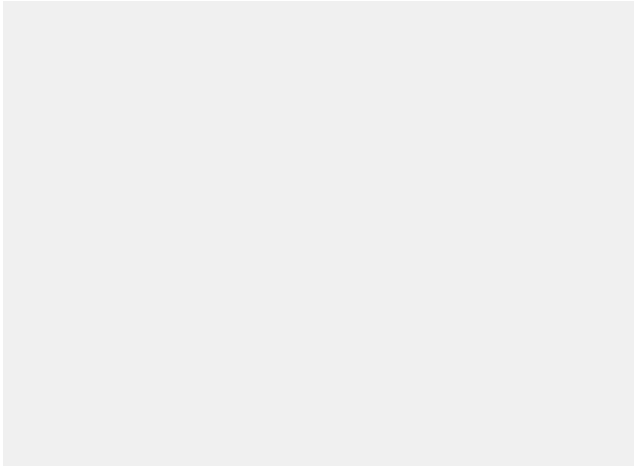

Step 2 :

_After enable administrator rights, Go to https://nodejs.org/en/download , download version 20.18.1(LTS)

_Extract the zip folder and rename to **node**

_In VS Code, open Power Shell and enter : $env:PATH += ";C:\Your\Directory\Path"

_ Verify your changes by enter : $env:PATH . At this momment, you shold see node path already included in your $env.

*NOTE : This is just a temporarily way for adding it to Power Shell, each time you create a new Power Shell you will need to add it to Power Shell again
